Join us for a tour of the **TDL Group** Southgate Drive Distribution Centre. Constructed on a relatively small footprint of less than 160,000 square feet, the building design utilizes vertical capacity within its two main temperature-controlled storage towers approximately 100 feet high. Much of the product putaway and replenishment is undertaken by four automated Storage & Retrieval Machine (SRM) cranes which are integrated with the facility's warehouse management system. Pallet and single carton conveyors augment the overall production system which has a capacity to move 75,000 units per day.
